From many voices to one message
- 04 The DAO moment & big picture**
The biggest transition of our times
- 06 The DAO structure & layers**
What features we enable with the DAO
- 08 DAO segmentation & journey**
How we broaden our mission and set sail
- 11 DAO demo time!**
Are you ready to start?

The DAO moment

You are embarking on a journey into the vast and growing Web3 space, given life to a new form of human coordination through Decentralised Autonomous Organisations.

“Corporation were built for the industrial age”

“DAOs are built for the information age”

Competitive Markets
Linear Money
Legal Contracts
Hierarchical Corporations
Centralized Institutions

The DAO Moment

Living Ecosystems
Circular Value Flows
Onchain Agreements
Decentralised Organisations
Cooperative Networks

Sociocracy

“ Sociocracy is a governance and decision-making system that emphasizes **transparency**, **equivalence**, and **effectiveness**, where decision-making power is **distributed** equally among members and structured by a set of rules.

It utilizes self-organizing **circles** responsible for decision-making within specific areas of the organization and encourages **feedback** and **continuous improvement**.

Sociocracy aims to create a more **democratic** and **participatory** organizational structure.”

AGSC 2023

The DAO structure

A vessel for your journey creating an action-driven collaboration space that can readily connect to other DAOs spawning entire ecosystems of autonomous entities working together.

AGSC 2023

The DAO layers

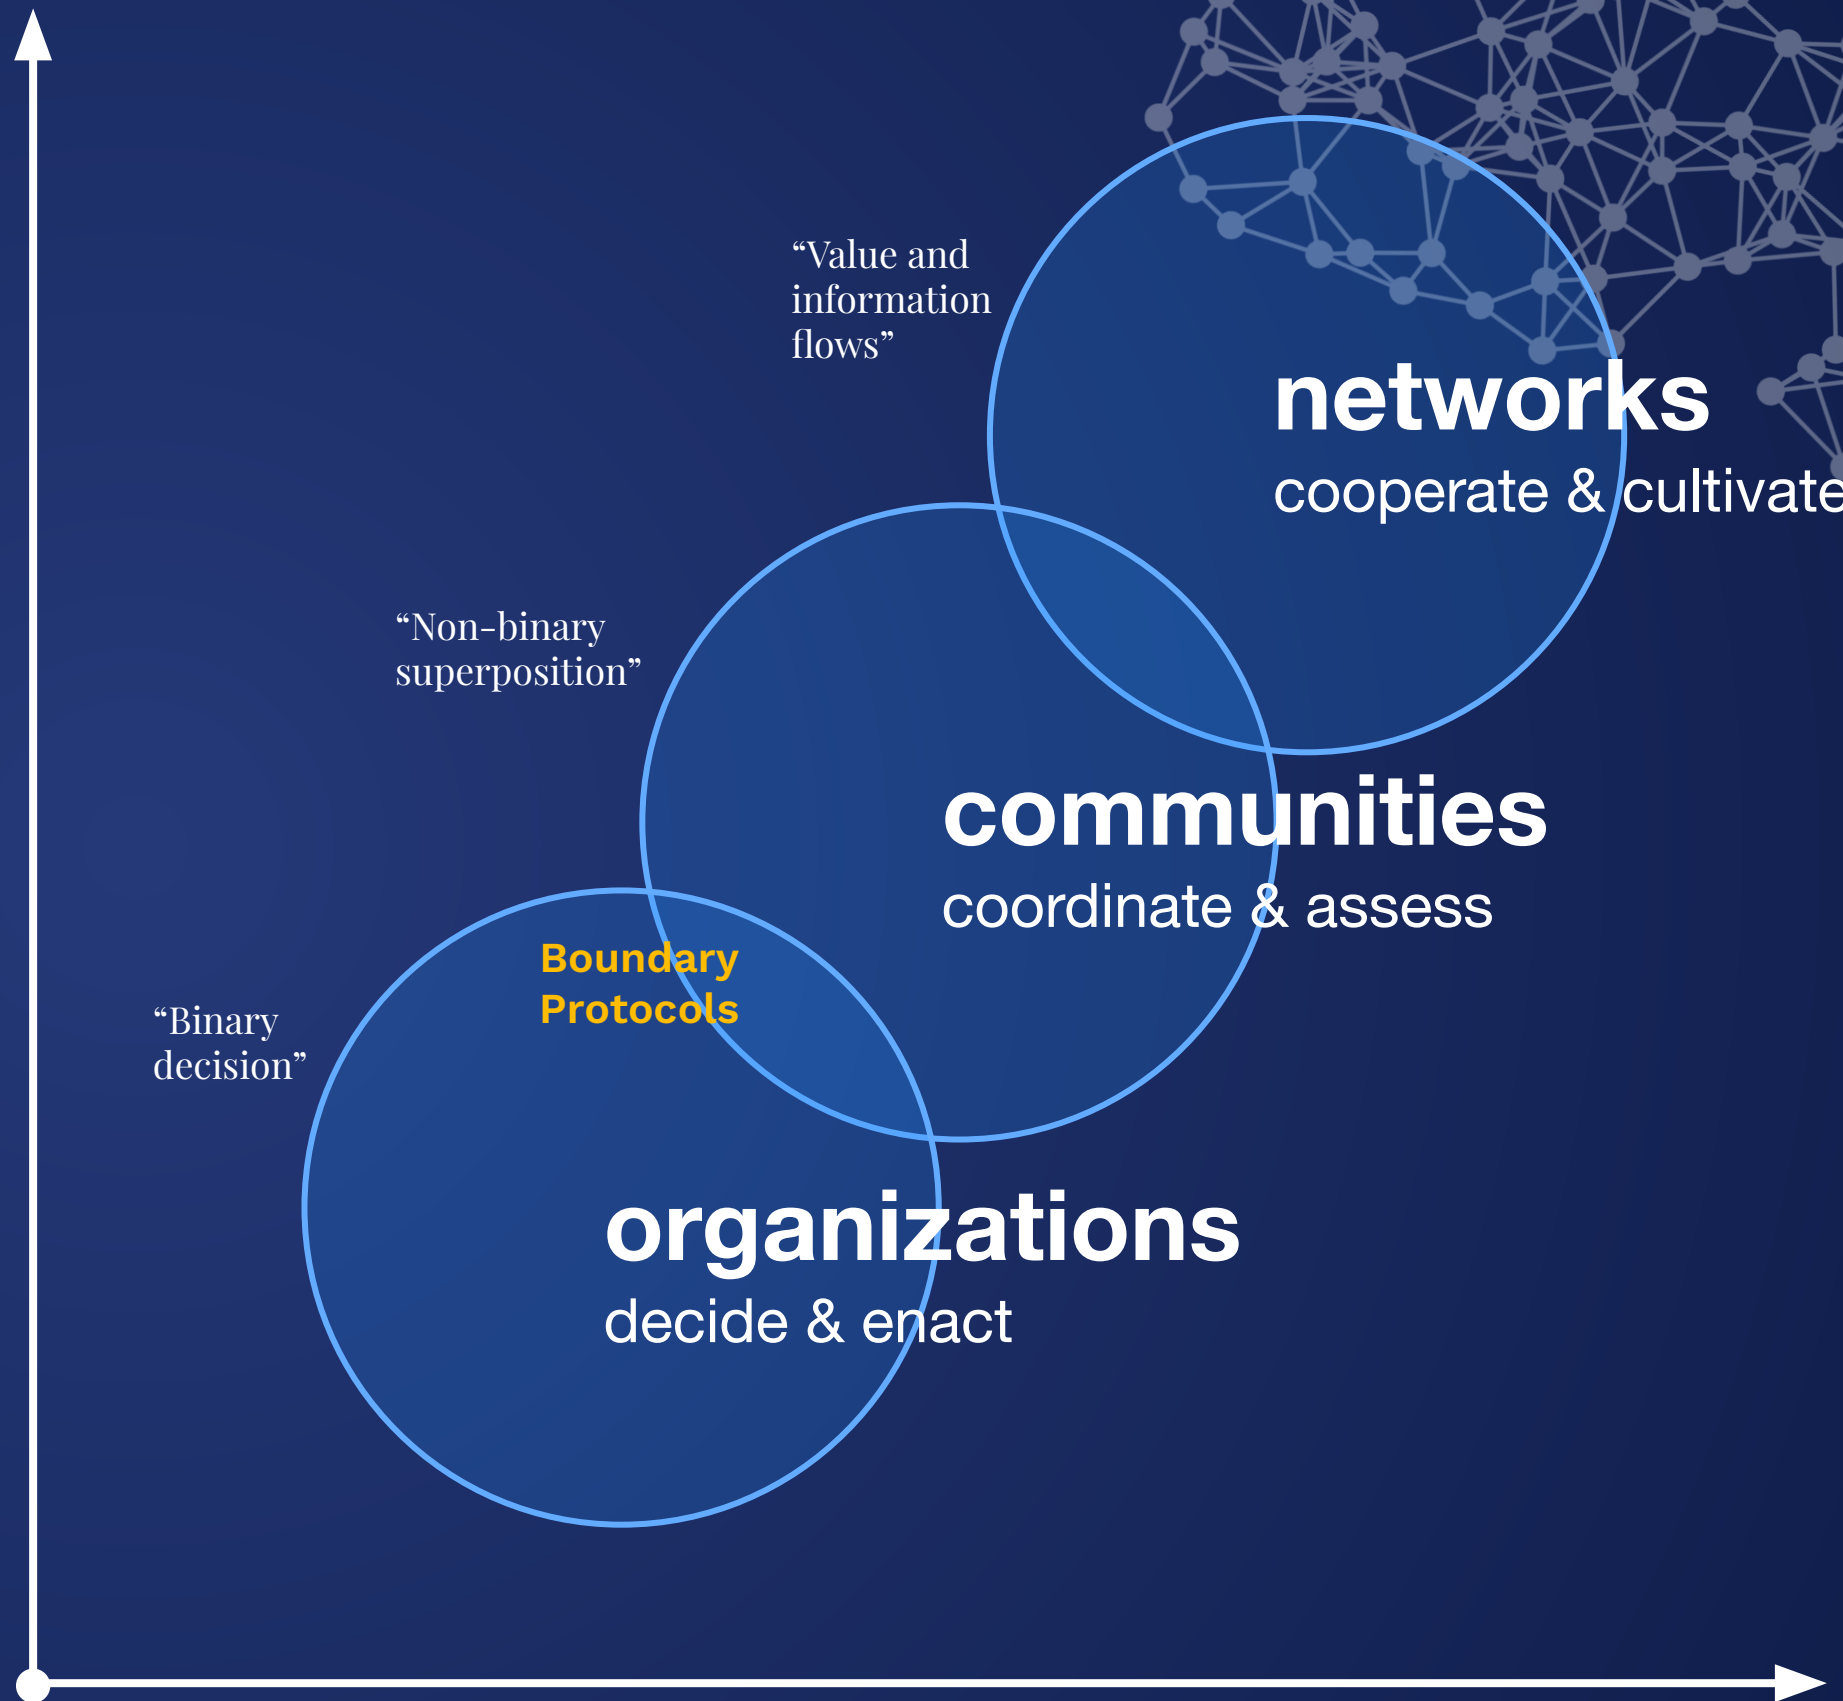

The DAO operates within different scopes and across different scales. Each scope requires a different approach as to how we work, how we decide and how we adapt, each scale is separated by a membrane and boundary protocols.

wild

structured

action-driven

community-oriented

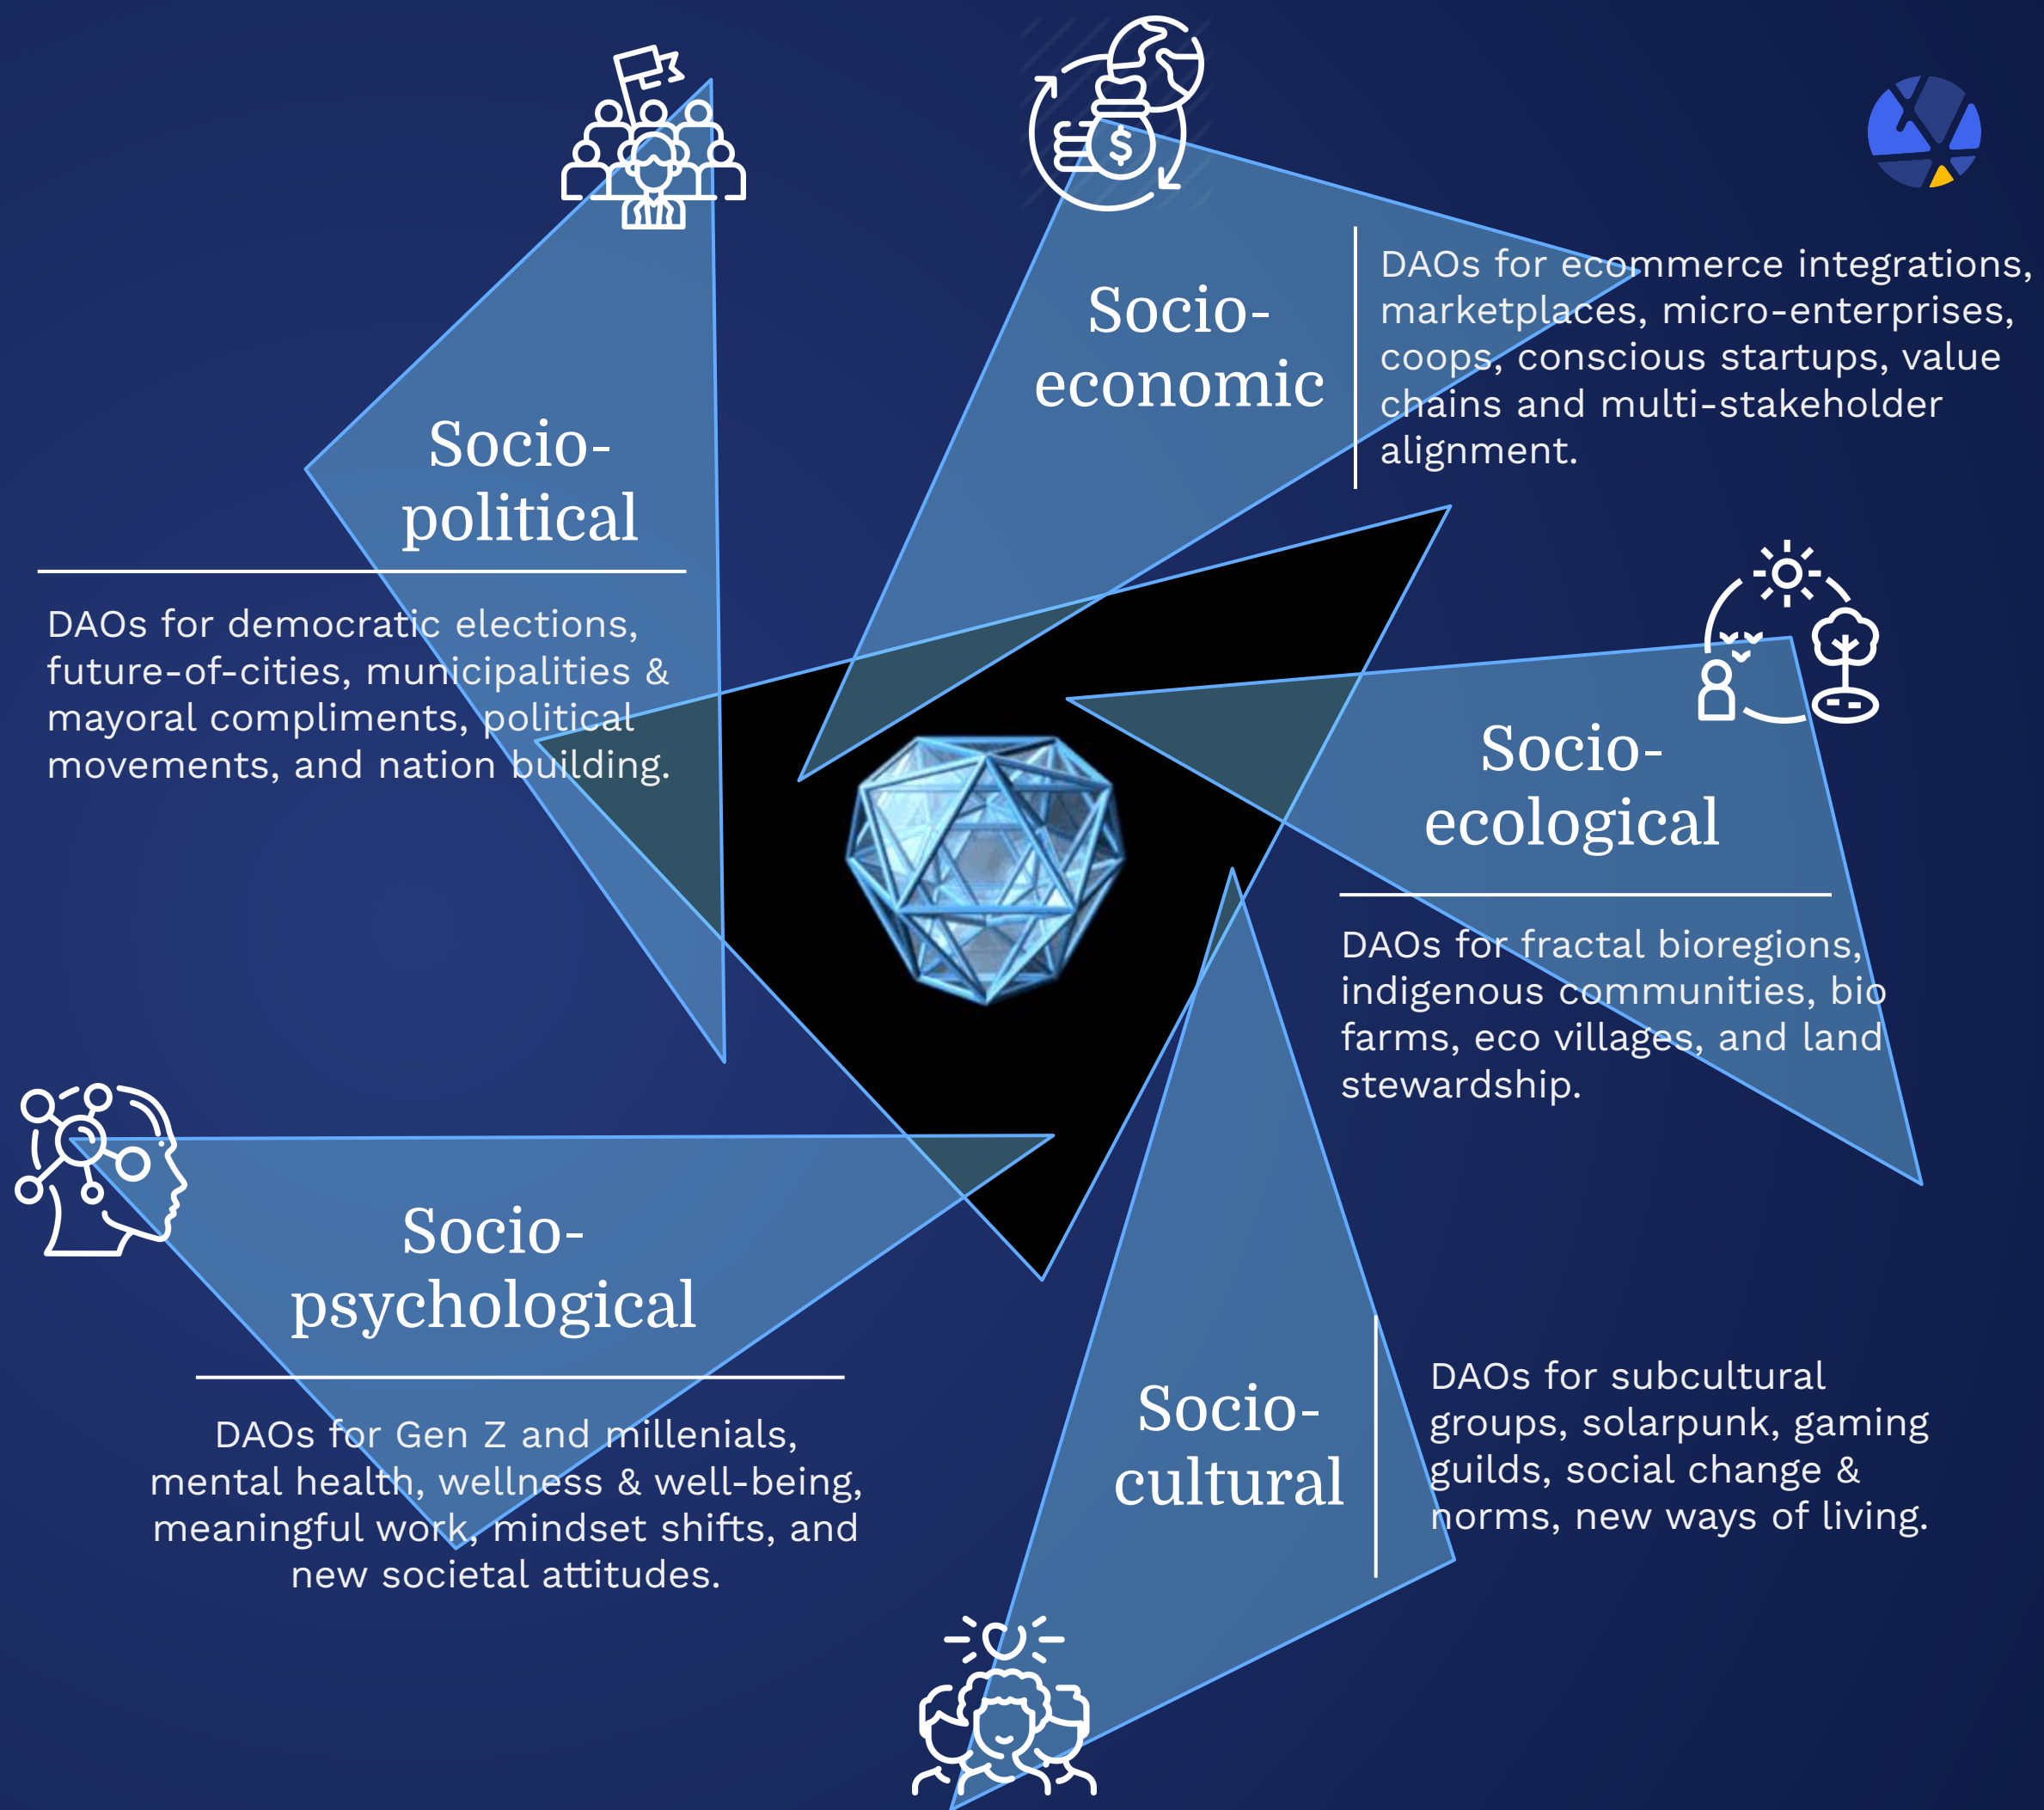

AGSC 2023

The DAO segmentation

The DAO opens up new portals and creates new patterns for socio-political, socio-ecological, socio-economic, socio-psychological, socio-cultural spaces. Every segment launches an exploration into new territory that fundamentally changes the way we think about our core values and belief systems.

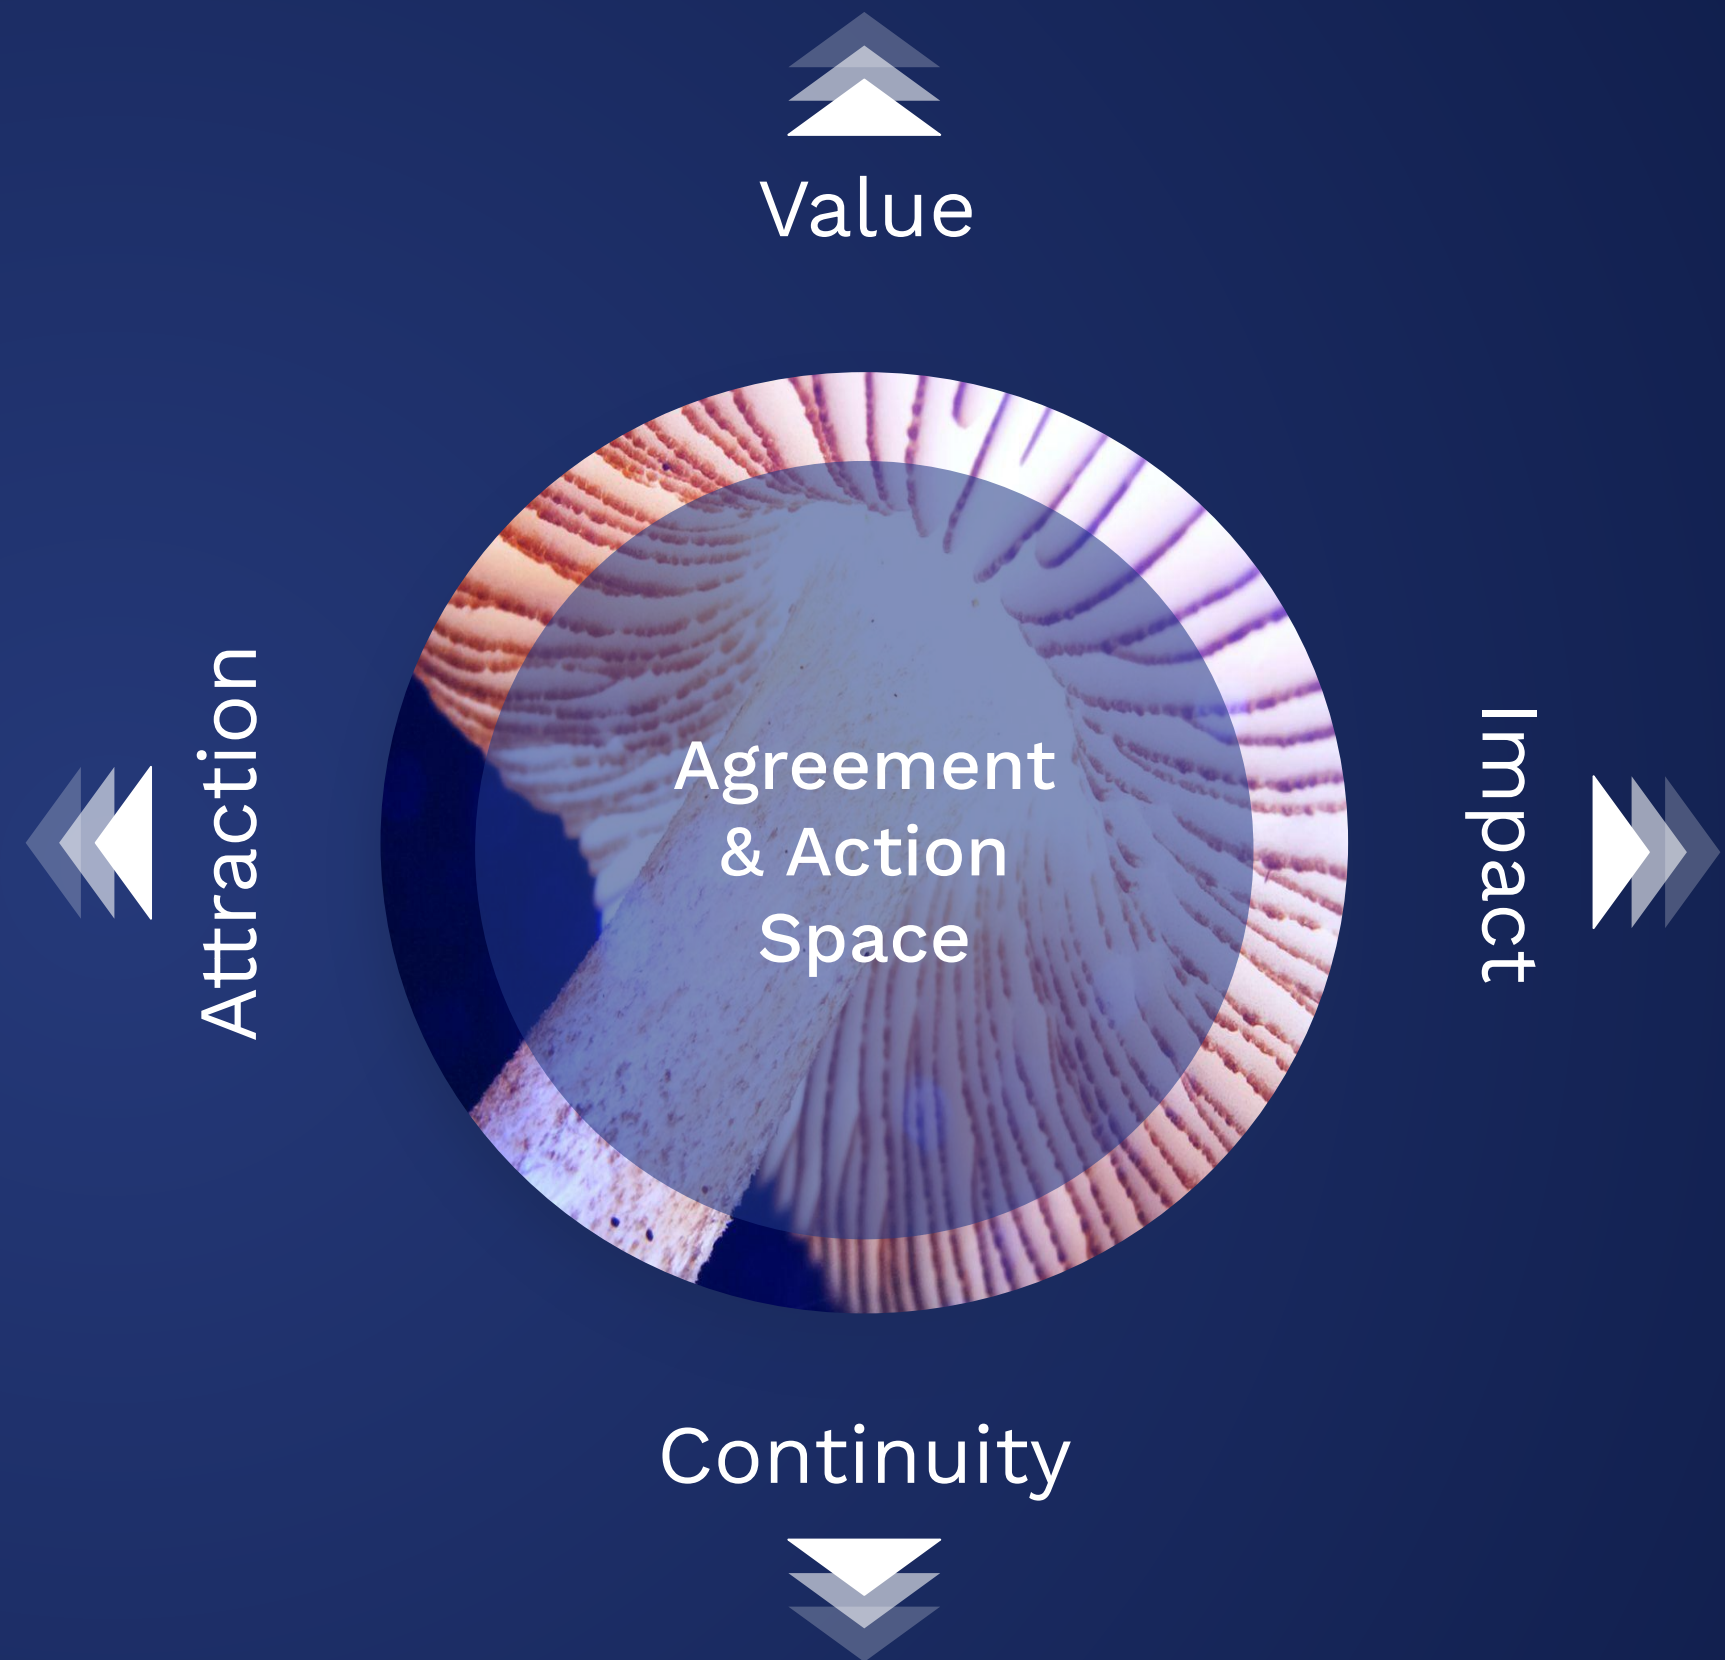

AGSC 2023

The DAO growth metrics

The DAO is an *Agreement and Action space* to prioritize, assign, contribute and compensate people, building a system to generate transparent protocols that allow open-ended innovation. The DAO expands (and contracts) along proper value, impact, continuity and attraction metrics.

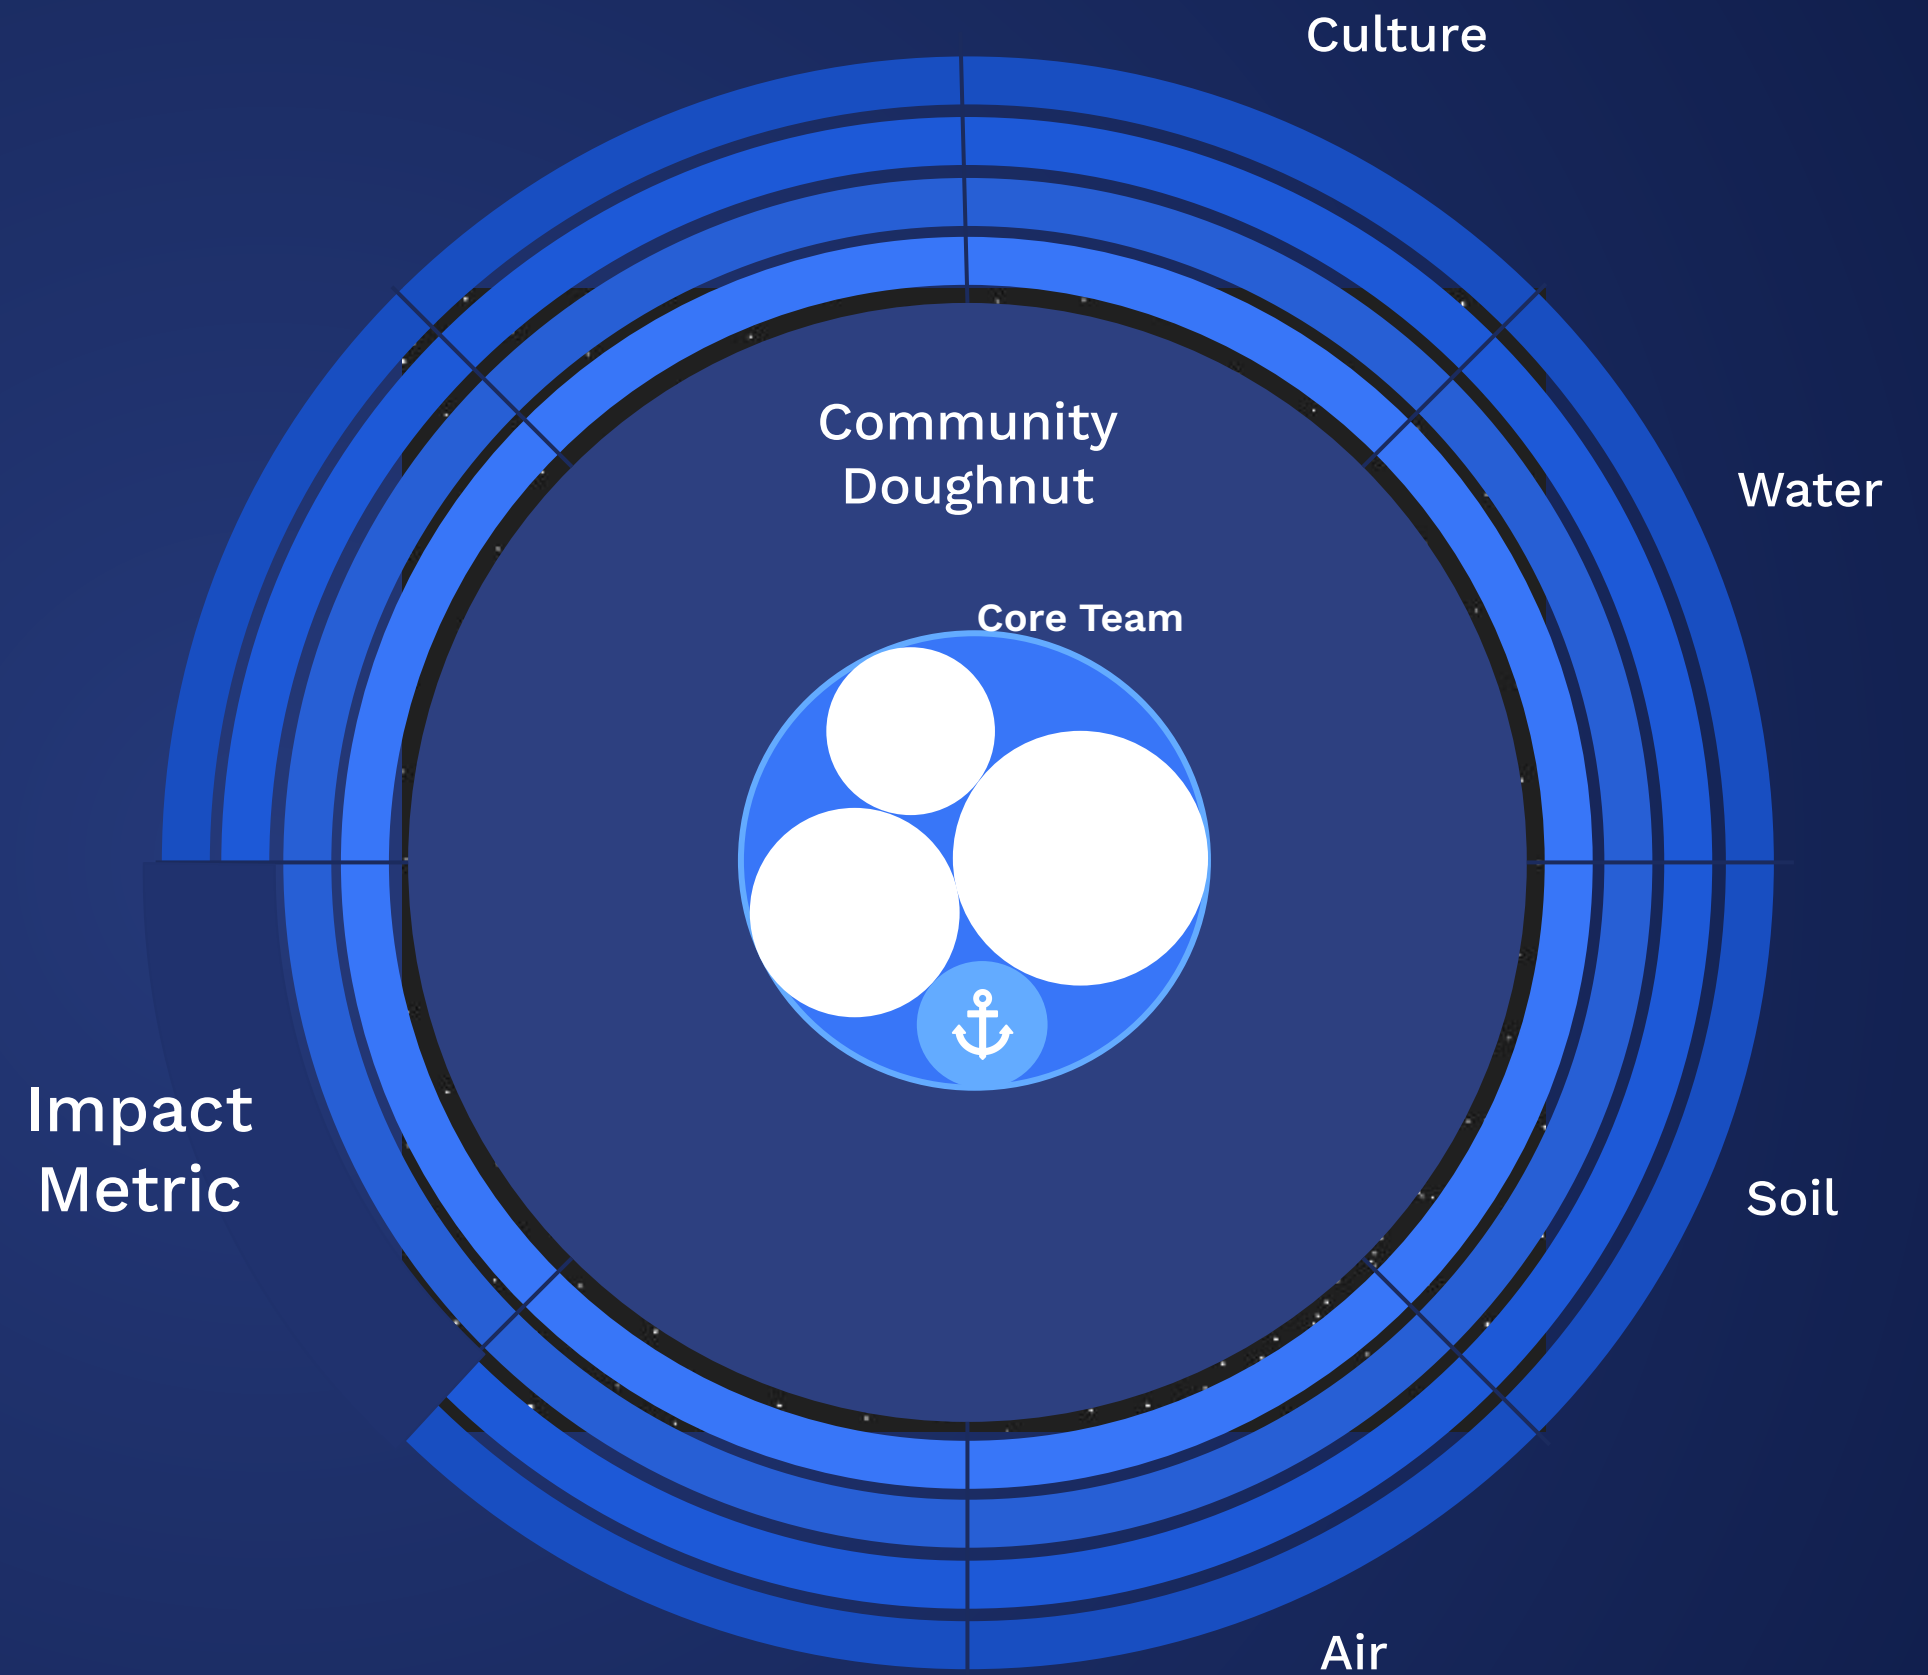

AGSC 2023

The DAO impact measures

A framework for measuring the impact of each DAO as part of a larger ecosystem.

The DAO journey ¹

Each step in this collaborative journey unfolding in the most fitting order through structure-preserving transformations witnessing an emerging structure of wholeness.

The DAO community

The are four possible stages in community and core team alignment. The ultimate goal is to move from a misaligned state towards a fully aligned state through the use of delegates and DAOs.

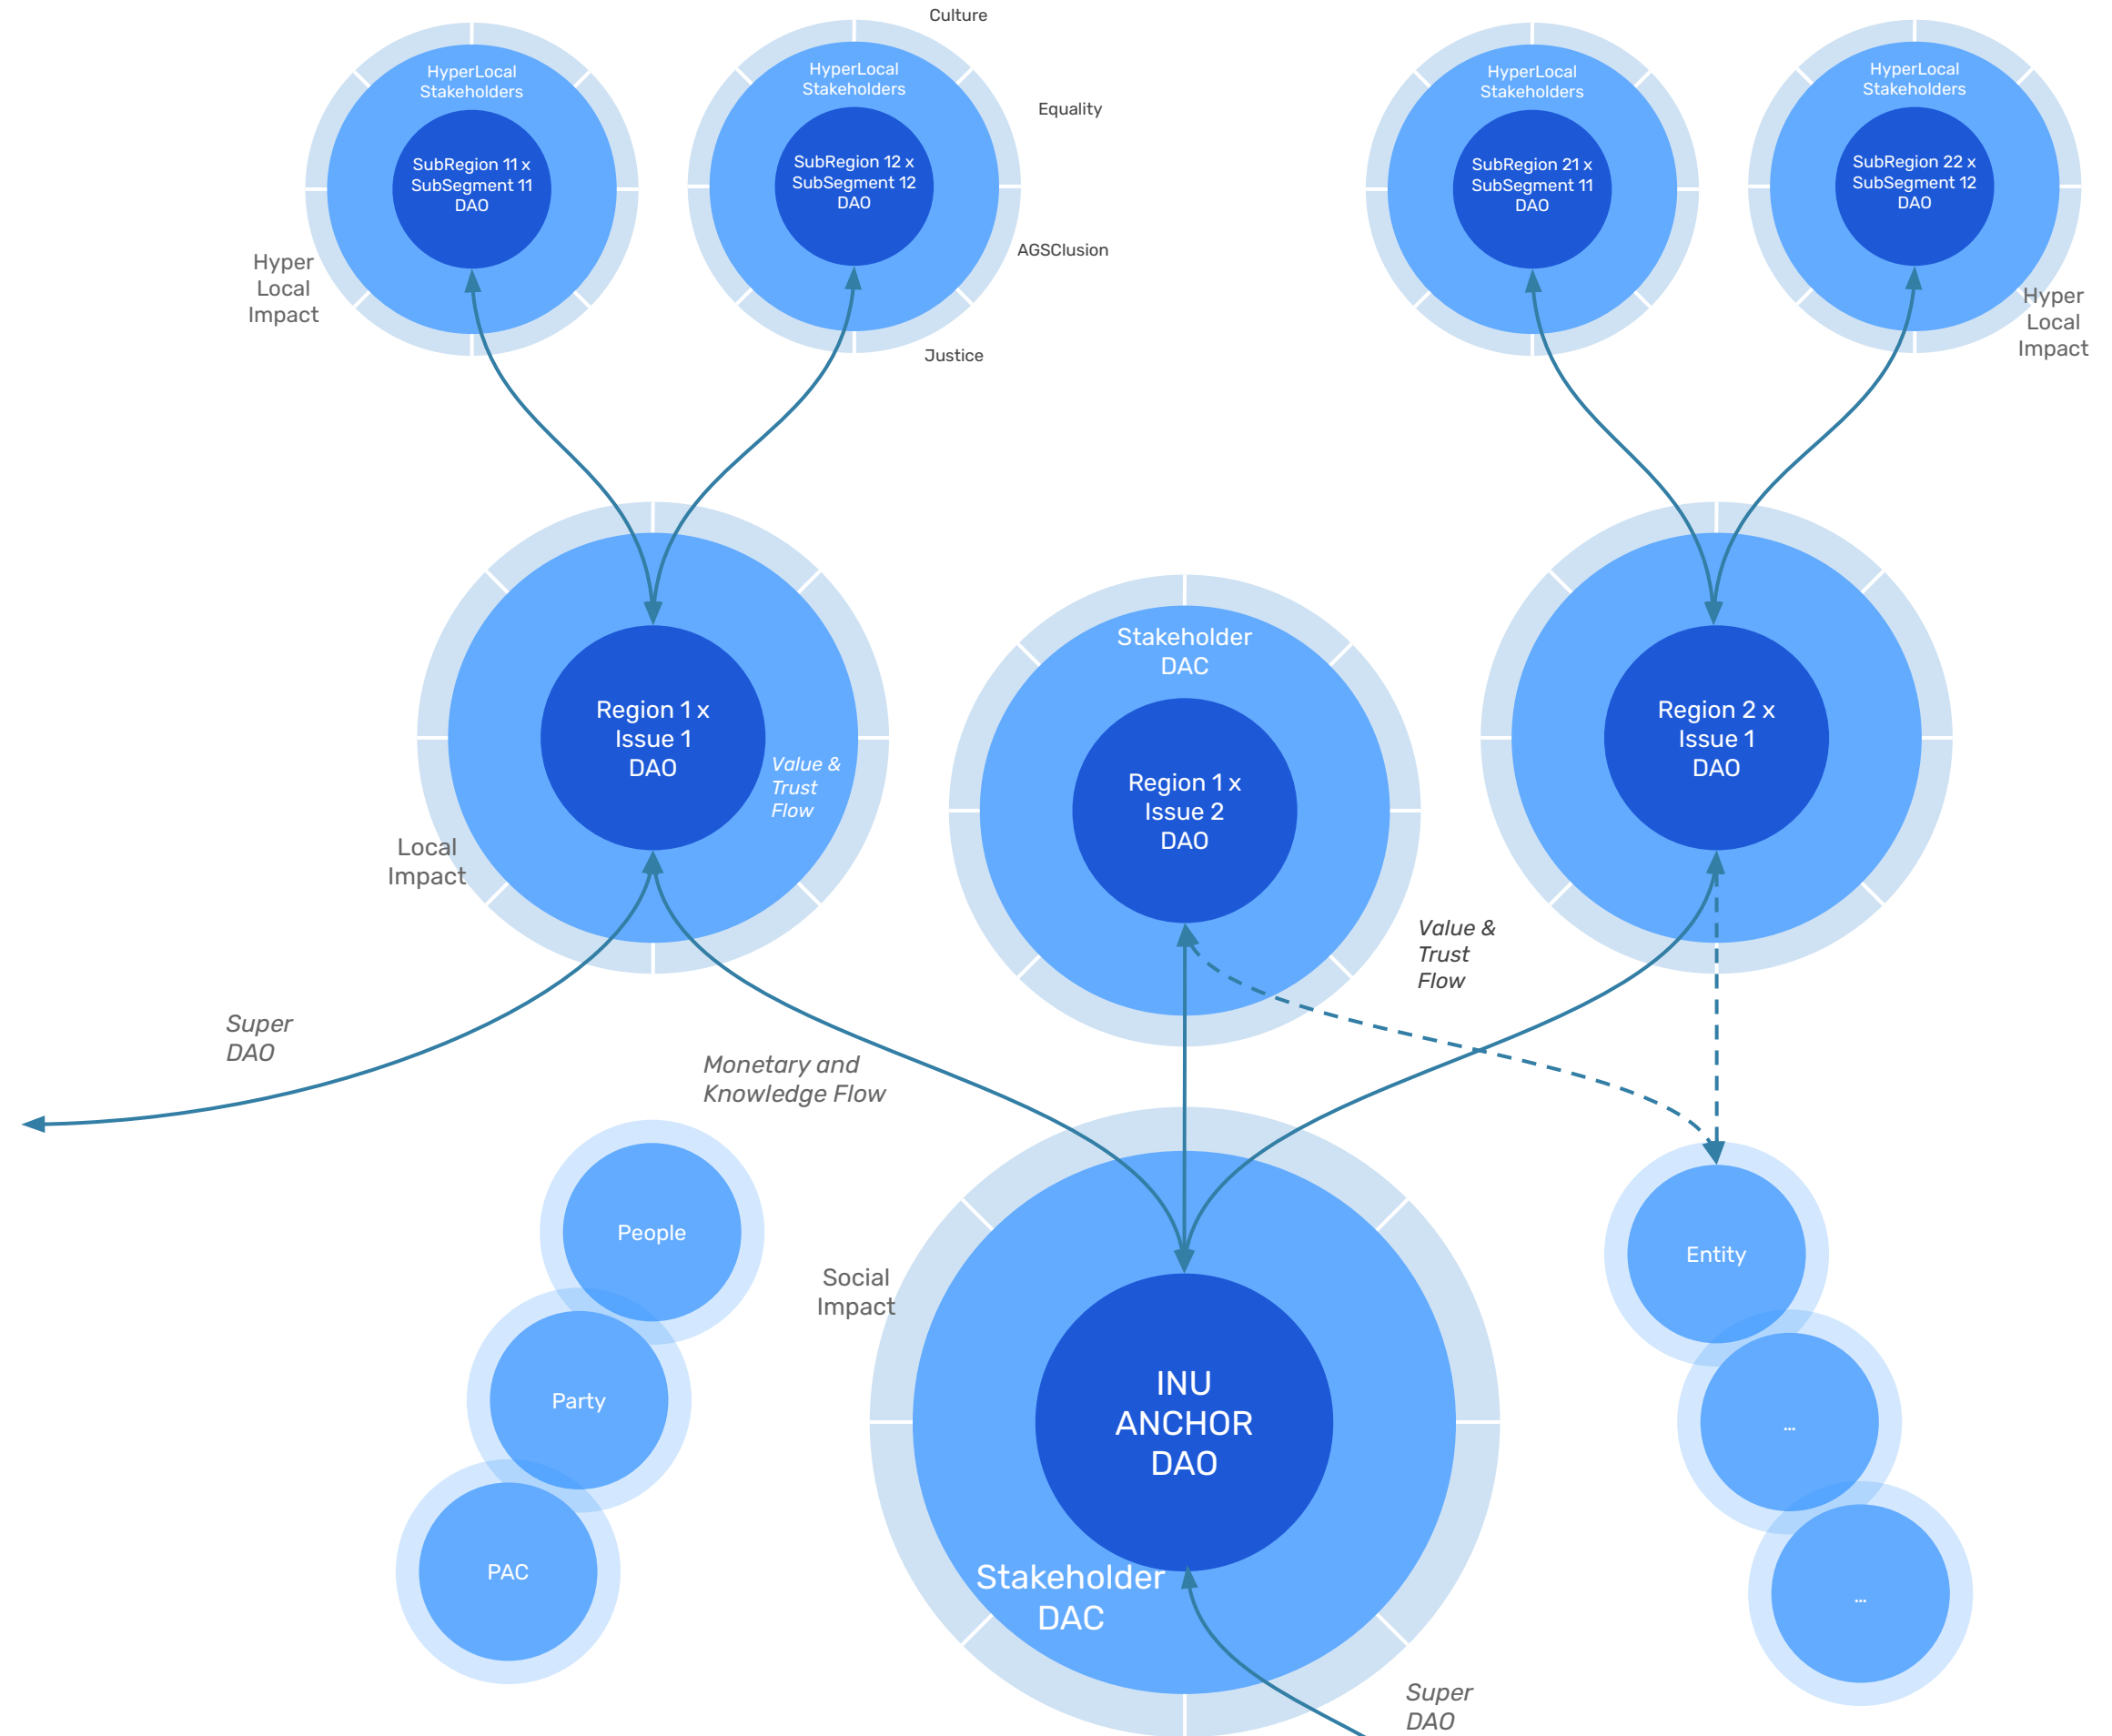

Structure & alignment

- Launching an ecosystem of issue-based DAOs at the local, regional and national level
- Each DAO assembling a core team and inviting community members
- Monetary, value and knowledge flows among and between DAOs
- Each DAO collecting data, measuring impact and shaping local primaries

The DAO Collaboratories
